## **Warranties and Disclosures**

RJR offers a limited one(1) year warranty against manufacturing defects in materials and workmanship encountered in normal, non-commercial use of the RJR Modular system. We will replace or repair this product, at our option and at no charge with new or reconditioned parts or will exchange the product with a new product if found to be defective within the limited warranty period. The product must be returned within one(1) month of the warranty period, with transportation charges prepaid to RJR. Replacement parts and products assume the remaining original warranty, or ninety (90) days, whichever is longer. RJR does not assume any responsibility for customer installations that result in damage to the golf cart, buggies, or trailer to which they are mounted. Use of the product on any other type of vehicle, or for any other use for which it was not intended, voids any and all warranties contained herein. There are no other warranties, specific or implied, other than those listed and described above, and no warranties whether express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose, shall apply after the express warranty period stated above. RJR shall not be liable for any special, incidental or consequential damages caused by the use, misuse, inability to use this product, or improper installation, regardless of the legal theory on which the claim is based, even if RJR has been advised of the possibility of such damages.

This system is only approved for use on Golf Carts, Amish buggies and in some cases, with prior requested specific instructions, use on trailers.

**General Notes:** Prices may change without notice and styles of products may change slightly in appearance, but the quality will always be as good or better. We have designed a state of the art modular system to bring your cart or buggy up to state code, and with this we tried to make the installation as simple as possible. We used color coded wiring, plug in options, led technology, and digital design to save money for those that use our system.

**Where and when you are not qualified to install any or all lights or products, it is advised that you retain a qualified person that understands the functions of lights and batteries so as not to incur any injuries.**

**Note:** As a safety measure, both front and rear running lights are automatically turned on with the main power switch.
